

The Parents Guide to AI: Setting Your Child Up for Success

Why AI Literacy Matters?

Over 75% of teens say they use AI today, and most of them are not getting coaching on how to use AI responsibly. Your child is likely using AI, whether you know about it or not. So make sure they are being taught how to use AI responsibly.

3 Things Every Parent Must Know About AI

- 1 AI isn't perfect, trust but verify** - It can make mistakes or "hallucinate." Make sure your child thinks critically when using AI, and confirms sources.
- 2 Be careful what is shared** - Make sure your child knows to never put personal information into any AI tools, such as selfies, home address, etc.
- 3 Set expectations with your child** - Make sure your child is using AI as a critical thinking partner, and not just misusing AI.
